Slick Pavements Doom Drivers

"If all drivers could see what I've seen, there would be few careless drivers on the road today," says Prof. Archie H. Easton, nationally known accident investigator and Director of the Motor Vehicle Research Laboratory of the University of Wisconsin.

Referring to the grisly scene he often encounters when summoned to an accident site, Prof. Easton said: "I certainly wouldn't want to force people to see these sights, but I often think that it would do some drivers a world of good to see first-hand the tragic consequences of drinking and driving, a moment of carelessness or inattention, or a simple case of poor judgment."

As Chairman of the National Safety Council's Committee on Winter Driving Hazards, Prof. Easton is particularly concerned about the added hazards at this time of year caused by ice and snow-covered pavements and the resulting consequences.

For severe conditions on both snow and ice, Prof. Easton recommended reinforced tire chains. He said that tests showed chains provided from four to seven times the pulling power of regular tires on snow and ice and reduced braking distance on glare ice by 50 per cent.

Electro Ag '70 is shaping up as another outstanding event. Local organizations will have an element on display. I know of no easier way for a farm operator to keep-in-touch with new developments.

The Appomattox group will start from the Community Center at 8:00 a.m. We plan to be back in the county by 3:30. This should allow ample time to feed and milk.

The Virginia BCIA for several years has rendered a tremendous service to Virginia's Cattle Industry.

One of the very fine services is the feeding test program for bulls.

These bulls are on feed at Culpeper and Dublin. In late December the bulls were weighed after being on feed 84 days. The average daily gain of all bulls at Culpeper was 3.00 lbs. The total gain was 3.04 lbs. The day report shows that the average weight - per - day - of - gain at this point is the highest we've ever had on test groups of bulls.

These bulls will be sold at Culpeper March 13 and on the 14 at Dublin.

The last year 91 bulls at Culpeper averaged $875 and 63 of these bulls averaged $859.

Production of Fire Cured Tobacco continues to drop world wide. Malawi, our most important competitor, grew 96,000 acres in 1967 but dropped to 65,000 in 1969. Production was also down from 26.9 million pounds to 10.5 million. In 1969 Italy produced a slightly larger amount of Fire Cured Tobacco than did Malawi.

the importance of zoning, saying that thousands of acres along N & W tracks which could have served as industrial sites have been used for housing or other purposes and now are unavailable to communities which need them to offer to propects.

Another N & W official, Charles A. Gearhart, Industrial Agent, who spoke here in October at the annual meeting of the Appomattox Chamber of Commerce, said, "A business climate is best developed by an Industrial Development Committee in conjunction with an Industrial Authority.

Among the local officials who spoke were Appomattox mayor H. B. Pack who told of the vastly improved water system now enjoyed by the town. Comparing underground sources with above - ground water supplies he said, "As long as you can get water from subterranean sources, you can't quarrel with quality."

James A. Smith, extension agent, agriculture, submitted to the supervisors an eight-page report entitled "Long Range Program Statement" prepared by the Appomattox County Extension Unit.

The report, Smith said, is a compilation of interviews of key people throughout the county "in order to identify major problems."

He said that the report identifies major problems in six areas: education, finance, goods and services, industry, people and agriculture.

Long range objectives are listed including, he said, the attainment of a high school education for the "majority of the population."

Smith added that extension services, related only to agriculture, now attempt to bring all types of services together for the betterment of the community.

The board, after consultation with sheriff L. L. Stanley granted permission to Farmers National Bank to install a direct communications line to the sheriff's office as part of the bank's burglar alarm system. Supervisor John Cole, speaking for the bank said, "The law requires us to upgrade our alarm system," and that the direct line was the most feasible of several plans suggested.

The board made official the appointment of W. E. Jamerson as floater member of the Central Virginia Planning District Commission. H. B. Pack was appointed an elected official member for a term from Jan. 1, 1970 to Dec. 31, 1971.

Quotas And Allotments Set For 1970

Farm acreage allotment and marketing quota notices for 1970 have been sent to about 84 producers of flue-cured tobacco in Appomattox County, according to J. P. Alvis, Jr., Chairman of the Appomattox County Agricultural Stabilization and Conservation (ASC) Committee.

The national allotment for the 1970 crop is 577,670 acres. The national marketing quot is 1,071 million pounds, 5 percent less than the 1969 quota. The national average yield goal for 1970 is 1,854 pounds per acre, the same as for 1969.

The acreage - poundage flue-cured tobacco program in each county is administered by the County ASC Committee. Under acreage - poundage marketing quotas, if marketings from a farm in a crop year are less than the poundage quota for the farm, the difference is added to the farm's quota -- both acres and pounds -- for the next year.

Similarly, marketings in excess of the farm's poundage quota are deducted from the farm's quota -- both acres and pounds -- for the next year.

This acreage - poundage program was approved by flue-cured tobacco growers in 1967 in referendum for the 1968, 1969 and 1970 crops.

Supervisor Cole said he regretted that he was forced because of his personal workload and civic responsibilities to decline a nomination to serve as chairman of the Commission.

Dr. J. B. Kinlaw, health director for Appomattox and Campbell counties and the city of Lynchburg, reported that realignment of the counties was made effective January 1 with the result that he is now health director here with Dr. Robert Parmenter, former acting director, now the health director for a seven - county group including Amelia, Buckingham, Charlotte, Cumberland, Lunenburg, Nottoway and Prince Edward.

Dr. Kinlaw spoke at length about a upcoming measles clinic which will be open to school children, grades one through five. The measles vaccine, given to each child through a "needle-less gun" is paid for in part, he explained by March of Dimes funds. He estimated that approximately 830 children in Appomattox could be reached through the clinic. Jaycees and local physicians of Appomattox will assist with the project, he said.
